

### CCH III

#### PROGRAMME AREA: NON-COMMUNICABLE DISEASES

##### GOAL:

- To reduce the morbidity and mortality due to chronic diseases
- To reduce deaths from chronic diseases by 2% per year
- To reduce avoidable, costly morbidity from chronic disease

##### OBJECTIVE/PURPOSE:

To strengthen capacity at the country and regional levels for the prevention and control of chronic diseases and their risk factors

SUB-PRIORITIES	OBJECTIVES	EXPECTED RESULTS	INDICATORS	OPPORTUNITIES FOR JOINT ACTION	BUDGET
<b>Policy and Plan of Action</b>	1. Promote the accelerated development and implementation of public policies and action plans	<p>1.1 Framework for formulation of public policy and action plans developed</p> <p>1.2 Inter-sectoral and inter-country collaboration in development of policies fostered</p> <p>1.3 Advocacy and sensitization of policymakers improved</p>	<p>1.1 Development and implementation of national policies in all countries by 2011</p> <p>1.2 Development of national plan of action based on Regional Strategic Plan implemented in 40% Member States by 2011; 75% by 2013 and in all countries by 2015</p>	<p>Development of regional policy framework and model policies to guide national inter-sectoral action such as physical activity in schools, smoking in public places</p> <p>Regional mechanism to provide guidance and inter-sectoral cooperation</p> <p>Chronic Disease Summit</p>	

Priorities	Objectives	Expected Results	Indicators	Opportunities for Joint Action	Budget
<p><b>Health Promotion and Disease Prevention</b></p>	<p>1. To support the development/strengthening of chronic disease surveillance systems to assess risk factors and determinants of Chronic Disease</p>	<p>1.1 Chronic disease surveillance systems to assess risk factors and determinants of chronic diseases instituted e.g. BRFSS aligned with WHO Steps</p>	<p>1.1 Behavioural risk factor surveillance system operating in 60% of countries by 2011</p> <p>1.2 Core indicators for risk reduction, prevention and control compiled and disseminated in all countries by 2011</p> <p>1.3 Studies to measure knowledge, attitudes and practices conducted in all countries by 2011</p>	<p>Implementation of a regional Behavioral Risk Factor Surveillance system</p>	

	<p>2. To support the implementation of prevention and risk factor reduction strategies and interventions</p> <p>3. To support the development of communication strategies and information dissemination for the strategies in (2) areas such as healthy eating, active living and tobacco control</p> <p>4. To empower people with chronic conditions and risk factors (and their families) and encourage self-management</p>	<p>2.1 Advocacy for the formulation and implementation of population-based strategies and interventions for risk factor reduction improved e.g. Framework Convention on Tobacco Control and Global Strategy on Diet, Physical Activity and Health</p> <p>3.1 Strategies for establishment of Healthy Settings Initiative started in at least 4 countries by 2013</p> <p>4.1 Self-management among people with chronic conditions and risk factors and their families improved</p>	<p>2.1 Interventions for prevention and risk factor reduction implemented in all countries by 2013</p> <p>3.1 Communication strategies and information dissemination for healthy eating, active living and tobacco control developed in 60% countries by 2011</p> <p>4.1 Strategies to empower patients and their families implemented in 60% of countries by 2012</p>	<p>Strategies to provide guidance and coordination for chronic disease prevention and control</p> <p>Multi-country research into interventions for prevention and risk factor reduction</p> <p>Development of strategies for the empowerment of patients and their families for their self-management</p>
